

Copy your spelling words carefully into the Look column using your word list. Then look at the first word and say it out loud. Fold the paper back on the dotted line. Then write the word in the Write column without peeking. Unfold the paper and carefully check the spelling against the word in the Look column. Circle the part of the word with the spelling problem if you missed it. Mark whether you got it right or wrong in the Check box.

Repeat for each spelling word.
